

FQA#1 - How can the Manufactured Housing Association of Atlantic Canada help me in my business?

By working as a group to give our industry a strong voice for issues that affect the MHAAC members, such as:

- Department of Transportation (DOT) issues of concern for the transportation of our product
- Building code issues that affect the cost of our product and place our industry on an even playing field
- Land Lease Community (LLC) issues that can affect our rights as Land Lease Community (LLC) owners
- Education – we offer Manufactured Housing Consultant (MHC®) courses to establish a sense of professionalism in our industry
- We offer our members an opportunity to voice their concerns on government, housing, transportation, and building codes issues they feel are important to their business and any of the other challenges we face
- Promoting the advantages of Manufactured Housing over alternatives - we provide an opportunity to network with other Manufacturers, Retailers, Land Lease Community Owners, Financial Institutions, Transporters, Warranty Providers and Suppliers
